Capabilities

Program Management Expertise

Titanium Cobra Solutions provides a wide range of program management expertise to our customers. Our capable group of Project Management Professionals (PMP)[®] are experts with years of experience to assist our clients with project and program management solutions. We offer a broad range of business services including project management classes, coaching, and consulting. Titanium Cobra's PMPs can facilitate Project Management with trainers and coaches working closely with our clients providing expertise and sound advice. To assist our client's growing their in-house project management capabilities, we also offer project management course ranging from project management fundamentals to agile methodologies and hybrid agile solutions.

Project Management Consulting Services

Analysis and Recovery - Titanium Cobra Solutions provides program and project rescue services. When a project goes awry, our consultants assist with analysis of what went wrong and provide recommendations for a recovery path.

Enterprise Program Management Office - Enterprise PMO is based on organizational level project management. Our consultants help the enterprise PMO to align the projects to the overall organization goals. By embracing corporate level PMO, the project of the organization can be better managed, and receive needed resources.

Developing Acquisition Strategies - Our consultants assist clients with future growth of their business by providing research and analysis of opportunities.

Risk Management - Our risk management consultants identify and evaluate projects risks, manage risk registers, facilitate qualitative risk assessments, conduct quantitative risk analyses, and develop risk mitigation strategies and plans. We develop qualitative risk assessments in conjunction with project stakeholders. We integrate those assessments into robust, quantitative cost, schedule risk analyses and monitor and mitigate any risks accordingly.

Technology and Operational Support Services

Titanium Cobra Solutions' technical staff is experienced in analysis, design, implementation, integration, and migration of technologies. We are a leading provider of comprehensive technical consulting and operational support services. Our consultants have real-world experience with providing implementation, support and management of information systems. We tailor our information technology services and operational support services to meet our client's business process requirements.

Programmatic Support Services

Titanium Cobra is skilled in developing Systems Engineering artifacts and preparing for system engineering technical reviews such as: System Requirement reviews (SRR), Preliminary Design Reviews (PDR), and Critical Development Reviews (CDR). Our analysts review all programmatic documentation, attend program reviews as directed, and provide comment, analysis and recommendations to the Government based on information obtained from the review that supports alignment to DoD and DoN guidance and policy.

Training and Curriculum Development

Titanium Cobra Solutions training team has developed curriculum that is designed to transform complex terminology and processes into easy to understand concepts, quickly developing professional skills and preparing for certification testing. Our workshop preparation courses are constructed for maximum student learning success and/or provide guidance on professional certification courses:

Courses offered: Project Management Foundations, PMP[®] workshops, Scrum Master, and ITIL. Our trainers will work with students to gain clear understanding of learning objectives and offer follow up coaching opportunities to provide feedback on their professional development and monitor their ability to best utilize the applied theories they have learned in our workshops.
